# MUHAMMAD ADIL

**Senior Flutter Developer | Cross-Platform Mobile Engineer**

Islamabad, Pakistan | +92 333 9749887 | muhammadadil102030@gmail.com

LinkedIn: linkedin.com/in/muhammad-adil-1137a41b4 | GitHub: github.com/Muhammad-Adil005

## PROFESSIONAL SUMMARY

Senior Flutter Developer with 5+ years of experience delivering 20+ cross-platform Android and iOS applications for startups, enterprise clients, and international businesses. Expertise in Flutter, Dart, Firebase, REST APIs, Clean Architecture, MVVM, Bloc, GetX, Riverpod, payment gateway integration, Google Maps, CI/CD (GitHub Actions, GitLab CI, Codemagic), and Node.js. Experienced in mentoring developers and delivering production-ready applications.

## TECHNICAL SKILLS

- **Mobile Development:** Flutter, Dart, Android, iOS, Responsive UI, Animations
- **State Management & Architecture:** Bloc, GetX, Provider, Riverpod, Clean Architecture, OOP, Design Patterns
- **Backend & Integration:** Node.js, Express.js, REST APIs, JSON, Firebase (Authentication, Firestore, Cloud Messaging, Realtime Database), Tap Payment Gateway, Salla APIs, Google Maps API, Push Notifications
- **Blockchain:** Crypto wallet integration (Wallet Connect)
- **Databases:** SQL, Firebase Firestore
- **Tools & Practices:** Git, GitHub, CI/CD (GitHub), Jira, Testing, Debugging, App Store Deployment, AWS Fundamentals

## WORK EXPERIENCE

**Flutter Developer** — Fexen Smart Solutions, Islamabad **Jun 2025 – July 2026**

- Designed, developed, and maintained cross-platform Android and iOS applications in Flutter within an agile product team
- Implemented scalable state management using **Bloc** and **GetX** across production applications
- Integrated REST APIs, authentication flows, payment systems, and real-time push notifications in collaboration with backend engineers
- Contributed to blockchain-based product features, including crypto wallet connection (**Wallet Connect**) integration
- Translated UI/UX designs into responsive, pixel-accurate interfaces alongside the design team
- Managed version control and automated workflows using Git and GitHub-based CI/CD

**Mid-Level Flutter Developer** — Soft Thrive, Rawalpindi **Sep 2024 – Jun 2025**

- Delivered multiple client mobile applications end to end, including **Sareen** (separate Driver and User apps) for a Saudi Arabian client
- Integrated **Salla APIs** for e-commerce functionality and **Tap Payment Gateway** for secure in-app transactions
- Managed complex third-party API integrations and backend communication, ensuring reliable data flow and smooth user experience
- Collaborated in cross-functional teams to scope, build, and ship features on client deadlines

**Associate Software Engineer** — Micro Merger (Pvt) Ltd, Islamabad **Apr 2024 – Sep 2024**

- Developed and supported large-scale government software projects, including healthcare tracking, data entry systems, and polio eradication program tools
- Worked with QA teams on test cycles and defect resolution to maintain product quality across releases
- Partnered with the requirements team to refine specifications and deliver solutions aligned with stakeholder needs

**Junior Flutter Developer** — Apimio, Islamabad **Jul 2023 – Apr 2024**

- Built core features for **Our Cart**, a shopping and note-taking mobile application
- Integrated Firebase services for real-time data management and cross-platform synchronization
- Debugged and optimized application performance in collaboration with senior developers

**Flutter Developer Intern** — Daxno Technologies (Pvt) Ltd, Rawalpindi **Jun 2022 – Aug 2022**

- Contributed to 20+ client projects, implementing UI/UX components and responsive layouts in Flutter
- Translated client requirements into functional application screens under senior developer review

**Mobile Application Developer** — Upwork / Fiverr **Jan 2022 – Jul 2023**

- Delivered custom Flutter mobile apps for international clients sourced through Upwork and Fiverr.
- Integrated REST APIs, Firebase services, and third-party payment gateways into client applications.
- Maintained strong client relationships through clear communication and on-time, quality delivery.
- Managed projects independently, from requirements and UI/UX to testing and app store submission.

## PROJECTS

**Semi Pro — Sports League Management App** *(Flutter, Firebase)* · **Live on App Store**

Comprehensive sports league management application co-developed from concept to publication on the Apple App Store. Owned the complete product lifecycle — ideation, UI/UX design, Flutter implementation, Firebase integration, and deployment — delivering a polished, production-ready application.

App Store: apps.apple.com/pk/app/semi-pro-manage-your-leagues/id6472147618

**Sareen — E-Commerce & Driver Apps** *(Flutter, Salla APIs, Tap Payment)* · **Saudi Arabian client**

Dual mobile applications (User and Driver) delivered end to end for a Saudi Arabian e-commerce client. Integrated Salla APIs for commerce functionality and Tap Payment Gateway for secure transactions, ensuring scalable architecture, reliable backend communication, and performance aligned with business objectives.

**Kariboni — Rental Management Platform** *(Flutter, Firebase Authentication + 2FA)*

Secure rental management platform enabling seamless interaction between renters, landlords, and property managers. Implemented Firebase Authentication with two-factor authentication (2FA), property management workflows, and real-time communication, ensuring robust security and streamlined user journeys.

**Blood Donation App** *(Flutter)*

Community healthcare application that streamlines the blood donation process by connecting donors, recipients, and healthcare facilities in real time. Designed with a focus on accessibility and intuitive user experience to support time-critical coordination between users.

**URL Shortener Service** *(Node.js, Express.js, EJS)*

RESTful URL shortening web service built with Node.js and Express, structured with a clean, modular architecture — separated models, routers, configuration, and utilities — with server-rendered EJS views and an organized test setup.

GitHub: github.com/Muhammad-Adil005/url_shortner_nodejs

**Restaurant Food App — Backend APIs** *(Node.js, Express.js)*

Backend REST APIs for a restaurant food-ordering application, engineered with clean code architecture. Controllers, middleware's, models, and routes are fully separated to maximize maintainability, scalability, and ease of onboarding for new developers.
